Nensi Sakhiya

Senior Software Engineer | AI Engineer | Full Stack | DevOps
Ahmedabad, Gujarat, India
+91 8347049953 nensinsakhiya@gmail.com linkedin.com/in/nensi-sakhiya-96580b208

Software engineer building AI products, MERN and Next.js services, and React Native applications. Implements LLM features, retrieval-augmented generation, AI agents, voice agents, and computer-vision workflows, and runs them on AWS with Docker, Kubernetes, and CI/CD. Combines Python, Node.js, React, React Native, and vector search to put intelligent workflows into production software.

Education

Saurashtra University
Bachelor of Computer Applications (BCA) – 66.83%

Gujarat Secondary and Higher Secondary Education Board (GSHSEB)
12th Commerce – 64.30%

Gujarat Secondary Education Board (GSEB)
10th Standard – 83.84%

Work Experience

Buzytech Technologies Pvt. Ltd. Apr 2026 – Present
Senior Software Engineer (Full-Time, Remote) *Remote*

- Developing and maintaining scalable web and mobile applications for international clients.
- Designing application architecture, implementing APIs, and optimizing application performance.
- Collaborating with cross-functional teams to deliver high-quality software solutions.
- Following Agile methodologies, conducting code reviews, and mentoring junior developers.

Budventure Technologies Pvt. Ltd. Feb 2025 – Apr 2026
Senior Software Engineer *Ahmedabad, Gujarat, India*

- Developed and maintained scalable full-stack web applications using Next.js, Node.js, and PostgreSQL.
- Designed and implemented RESTful APIs, backend services, and database architectures for enterprise-grade applications.
- Deployed applications on AWS EC2 and supported cloud releases for production workloads.
- Developed and maintained cross-platform mobile applications using React Native.
- Integrated third-party services, authentication systems, and payment gateways into web and mobile applications.
- Collaborated with product managers, designers, and developers to deliver software using Agile methodologies.

PLUSINFOSYS Apr 2024 – Jan 2025
Software Engineer *Ahmedabad, Gujarat, India*

- Developed and enhanced web and mobile applications based on client requirements.
- Implemented new features, resolved production issues, and improved application performance.
- Integrated APIs and optimized application workflows to improve user experience.
- Collaborated with development teams to ensure timely delivery of software solutions.

TRooTech Business Solutions Pvt. Ltd. Nov 2022 – Feb 2024
Software Engineer (React Native Developer) *Ahmedabad, Gujarat, India*

- Developed and maintained cross-platform mobile applications using React Native.
- Integrated GraphQL and REST APIs for communication between mobile applications and backend services.
- Implemented reusable components, state management, and responsive user interfaces.
- Optimized application performance, debugged production issues, and improved user experience.
- Worked with UI/UX designers and backend teams to deliver scalable mobile solutions.

Metizsoft Solutions Pvt. Ltd. Sep 2021 – Nov 2022
Junior Software Engineer (React Native Developer) *Ahmedabad, Gujarat, India*

- Developed Android and React Native applications for multiple client projects.
- Built responsive mobile interfaces and integrated REST APIs.

- Implemented application features, bug fixes, and performance improvements.
- Participated in testing, deployment, and maintenance throughout the development lifecycle.

TOPS Technologies Pvt. Ltd. Nov 2020 – Mar 2021

Internship Trainee (Android Development) *Rajkot, Gujarat, India*

- Completed professional Android development training focused on Java and the Android SDK.
- Developed sample Android applications and learned mobile application architecture.
- Gained hands-on experience debugging, testing, and deploying Android applications.

Projects

DocForUs – AI Healthcare Platform | *AI Healthcare Chatbot, MERN, RAG, Pinecone, LLMs, Docker, AWS ECS*

- Led the DocForUs AI healthcare platform, centered on an AI healthcare chatbot that answers medical-information questions from indexed clinical and healthcare documents.
- Built the chatbot conversation flow for natural-language questions, multi-turn follow-ups, and answers returned in the same chat session.
- Designed the retrieval-augmented generation pipeline: healthcare documents are embedded, stored in Pinecone, and the passages relevant to each question are retrieved before the large language model writes the reply.
- Implemented document upload, chunking, semantic search, and source-backed responses so chatbot answers stay tied to the retrieved medical content rather than unsupported text.
- Developed the MERN application around the chatbot, including secure REST APIs, role-based access control, and cloud-native microservices for chat, documents, and user access.
- Containerized the chatbot and platform services with Docker, deployed them on AWS ECS through GitHub Actions CI/CD, and tuned monitoring, performance, and scalability for production.

Fox CRM – AI Customer Relationship Management | *Next.js, Node.js, LLM, MongoDB*

- Developed an enterprise AI CRM for leads, customers, and deals, with AI lead scoring, opportunity prediction, and next-best-action recommendations.
- Built a multilingual AI voice agent using speech-to-text, text-to-speech, and voice cloning, with automatic CRM updates.
- Integrated Meta Leads, HubSpot, the WhatsApp Business API, email automation, and workflow automation.
- Designed cloud-native services with Docker, REST APIs, and microservices.

Fox Meetings – AI Meeting Intelligence | *Next.js, Node.js, LLM, Google APIs, Zoom*

- Developed an AI meeting platform covering the meeting lifecycle from capture to follow-up.
- Built an AI note taker with live transcription, speaker identification, and audio and video recording.
- Generated structured minutes of meeting and follow-up emails from the transcript.
- Automated lead creation and CRM status updates from meeting outcomes.
- Integrated Google Meet, Microsoft Teams, Zoom, Google Calendar, and Microsoft Outlook Calendar.

Fox Tracking – AI Video Analytics | *Computer Vision, AWS Rekognition, Node.js, Python*

- Developed real-time analytics for CCTV and IP camera streams.
- Implemented facial recognition, attendance, and access control.
- Built detection for fire, smoke, falls, theft, PPE compliance, and crowd analytics.
- Integrated real-time alerts, cloud monitoring, and role-based management dashboards.
- Optimized video streaming, inference performance, and scalability for production AI deployments.

SustainAI – Sustainability Intelligence | *Python, FastAPI, AWS Bedrock, Docker, ECS*

- Developed a cloud-native platform for ESG and sustainability data analysis.
- Integrated AWS Bedrock foundation models for analytics and automated report generation.
- Built REST APIs with Python and FastAPI.
- Automated delivery with GitHub Actions, Docker, and Amazon ECS.
- Hardened cloud security, scalability, and high availability for enterprise deployment.

AI Attendance Management System | *Node.js, AWS Rekognition, Docker, MongoDB*

- Developed attendance and workforce management with facial verification through AWS Rekognition.

- Implemented real-time attendance, geolocation, and mobile check-in.
- Deployed cloud-native microservices with monitoring and automated release pipelines.

AI Content Management Platform | *Next.js, Node.js, AWS, Docker*

- Developed an enterprise platform for AI content management and automated content generation.
- Integrated intelligent content workflows and automated publishing pipelines.
- Containerized services with Docker and deployed the cloud infrastructure on AWS.
- Optimized application performance, scalability, and CI/CD automation.

Fox Sites – AI Website & E-Commerce Builder | *Next.js, React, Node.js, AI*

- Developed a no-code builder for websites and e-commerce storefronts.
- Implemented AI-generated SEO metadata, keywords, page titles, and descriptions.
- Built an e-commerce engine for products, orders, shipping, and delivery management.
- Connected the builder with Fox CRM, Fox Meetings, and the other FoxSuite modules.
- Optimized CDN delivery, hosting, and page performance.

Zappfresh Mobile Ecosystem | *React Native, Redux, REST APIs, GPS*

- **Applications:** Customer App (Android) | Customer App (iOS) | Rider App | Sales App | Partner App
- Shipped customer, rider, sales, and partner apps for Android and iOS covering orders, payments, push notifications, and delivery tracking.
- Built real-time GPS, geofencing, and route optimization for rider pickup and delivery.

Welzaa Mental Health Platform | *React Native, Next.js, Node.js, PostgreSQL, AWS*

- **Website:** https://welzaa.com
- Built the mobile app, admin panel, and backend for counselor matching, scheduling, authentication, and payments.
- Delivered REST APIs, PostgreSQL data models, and administration dashboards on AWS.

Evify Rider & Fleet Management Platform | *React Native, IoT, Bluetooth, GPS*

- **Applications:** Rider App | Team App (Android) | Team App (iOS)
- Built rider and team apps for delivery, attendance, and role-based fleet operations.
- Integrated Bluetooth IoT vehicle access with real-time GPS, telemetry, and operations dashboards.

Tourigen Travel Experience Platform | *React Native, Redux Thunk, Axios*

- **Applications:** Android | iOS
- Built Android and iOS travel booking with search, guest management, and booking workflows.
- Connected REST APIs through Axios and managed state with Redux Thunk.

PMPeople Project Management Platform | *React Native, Node.js, REST APIs*

- **Applications:** Android | iOS
- Built mobile project planning, resource management, collaboration, and reporting for Android and iOS.
- Integrated Node.js REST APIs and improved client performance on both platforms.

Technical Skills

AI & Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, AI Voice Agents, Speech-to-Text, Text-to-Speech, Voice Cloning, LangChain, LangGraph, OpenAI GPT, Google Gemini, AWS Bedrock, Vertex AI, Hugging Face, Computer Vision, AWS Rekognition
Vector Databases: Pinecone, Qdrant, ChromaDB, Vector Embeddings, Semantic Search
Programming Languages: JavaScript, TypeScript, Python, HTML5, CSS3
Backend: Node.js, Express.js, NestJS, FastAPI, Python, REST APIs, GraphQL, WebSockets, Socket.IO, Microservices
Frontend: React.js, Next.js, Angular, Vue.js, Tailwind CSS, Bootstrap
Mobile Development: React Native CLI, React Native Expo, Android Development, Cross-Platform Mobile Apps, React Navigation
Cloud Platforms: Amazon Web Services (AWS), Google Cloud Platform (GCP), Microsoft Azure
DevOps & Infrastructure: Docker, Docker Compose, Kubernetes, Amazon ECS, Amazon EKS, CI/CD, GitHub Actions, Terraform, Nginx, Linux, PM2
AWS Services: EC2, ECS, EKS, Lambda, API Gateway, S3, CloudFront, CloudWatch, IAM, RDS, DynamoDB, DocumentDB, Elastic Load Balancer, ECR, Route 53
Databases: MongoDB, PostgreSQL, MySQL, Redis, SQLite, Firebase Firestore, DynamoDB, Amazon DocumentDB
Security: JWT, OAuth 2.0, OpenID Connect (OIDC), Role-Based Access Control (RBAC), HTTPS, API Security
State Management: Redux, Redux Thunk, Redux Toolkit, Context API, React Hooks
Mobile Features: Push Notifications, Camera Integration, Google Maps, Google Places API, Geolocation, Geofencing, Deep Linking, Bluetooth, Payment Gateway Integration
Tools: Android Studio, Xcode, Visual Studio Code, Postman, Git, GitHub, Bitbucket, Jira, Swagger/OpenAPI, NPM, Yarn
Practices: Agile, Scrum, SDLC, Code Reviews, Version Control, Technical Mentoring
